# DRY SUIT RENTAL - CARE INFORMATION

## ABOUT YOUR SUIT

Blue Dog Kayak takes the lead in renting the very best equipment on the market today. We want our customers to be dry and warm following a day of multiple rescues and wet exits. Therefore where possible we rent you Kokatat Gortex dry suits. These suits retail for about \$1600 so please read the follow information about care of your suit while on the expedition.

## PROTECTING THE GORTEX SOCKS

Your feet will stay dry if you protect the gortex socks. You will need to provide a pair of water shoes or booties at least one size bigger than your normal size to accommodate your sock and the gortex socks. You should **NEVER** walk around without the boots on as the smallest sharp object or shell can puncture the feet which results in a \$200 repair bill.

## GASKETS

The gaskets are laytex and can take a while to adjust to but they keep water out!

Please remove all jewelry and watches before putting on the dry suit. Split gaskets can result in a \$150 repair bill, please be careful.

## ZIPPERS

Zippers should be well waxed to ensure smooth operation, we provide this. Please make sure the zipper opens and closers' easily if not see an instructor **DO NOT** force zips

## ADDITIONAL INFORMATION

If you would like more information about your rental suit check out the Kokatat website
